

Geothermal Energy

Down:

1. type of energy found in the heat and steam that comes from Earth's interior
2. the center of the Earth
3. areas below the Earth's surface where geothermal energy is found

Across:

4. type of energy generated from natural resources such as sunlight, geothermal heat, wind, rain, and tides
5. the degree of heat present in a body or system
6. can be produced in some homes using geothermal energy
7. a hot spring in which water intermittently boils, sending a tall column of water and steam into the air
